NO STRESS

We can get stressed by many things like in our school, in our house, in a party place or in computer games. If there were no stress in the world, it would be a better. In school, when I make a mistake, I get angry or when we have a really hard exam and don't have much time, I get stressed a lot. Or when the teacher gives me a homework but I don't have much time to do the homework or when I fail the exam and I know my family will be angry to you etc. Stress is everywhere. I think there's no way to stop the stress in the world. But we can reduce it. Like when we stop working, we can have fun there are many things we can have fun like driving car or going to an amusement park or playing games etc. I don't want any stress in my world. There are a few places that have stress out like schools, hospitals, police stations and war places so we should reduce the stress there.
